About Us

Ksquare Energy Pvt. Ltd., based in Gujarat, is a leading solar energy solutions provider specializing in manufacturing solar array junction boxes, PV system materials, and offering comprehensive EPC services for utility scale and distributed solar projects. Our dedicated team ensures seamless project completion from design to commissioning. We also produce ACDB and DCDB Boxes and Earthing Kits for various solar applications. With over six years of experience, we've served esteemed clients like GEDA, MNRE, and Swaminarayan Gurukul, in addition to over 4000 residential and commercial projects. Our commitment to excellence, extensive experience, and broad customer base establish us as a trusted leader in the solar industry.

Very good and quick revert done within 24 hours,

Well attended and replaced faulty panels for my residential unit by Technician Mr. Kuldeep Sorathiya and Mr. Kishan Chauhan.

Great team Ksquare, all the best!!!

Highly Satisfied with K Square Energy Pvt. Ltd.

Had a solar panel system installed at my residence in Shahpur, Gorakhpur, by K Square Energy Pvt. Ltd. The overall process was smooth, with excellent installation quality. While there were some initial payment-related challenges, the operations team swiftly resolved them.

Special thanks to Abhishek Tiwari (Sales Engineer) for seamless coordination, ensuring quick net metering approval, and Ankit Mishra (Sr. BDM) for addressing my concerns professionally.

Scope for improvement: Better clarity in the initial payment process can enhance customer experience.

Overall, great service, professional team, and highly recommended!

Dr. Rajeev Patrick Das

What we Offer!!!

Solar Panels and Mounting Structures

"Our solar panels use advanced tech for durability and high power output, even in harsh environments."

Mounting structures **HDAC box pipe size 60x40mm**
or 40x40 mm

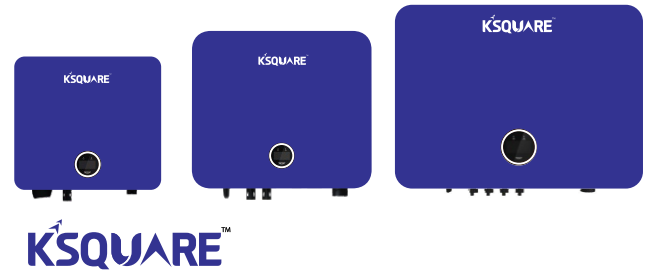

Solar Distribution Boxes (AC & DC)

“Equipped parts ensure continuous electricity flow, with advanced circuitry ensuring safety for both AC and DC systems.”

Inverters

Our inverters: Solar system's core, with advanced algorithms for efficient DC to AC conversion.

Cables

Even in harsh settings, our cables' minimal energy loss and great durability ensure that power is transmitted with minuscule loss.

Single Spike Earthing Kits

"Reliable grounding solution for solar projects, ensuring safety and stability in electrical systems."

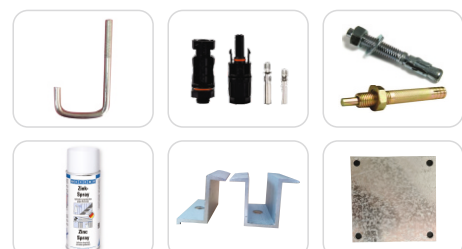

Solar PVC Solutions

SolPlast is your go-to partner for PVC organization. From weather-proof ties to sturdy conduits, we have tools for efficient solutions, eliminating cable chaos.

Other BOS

Ksquare prioritizes quality BOS material for solar success, sourcing premium cables and components, optimizing design for maximum efficiency and performance.

General Terms:

- Material dispatch and Installation shall be started upon DISCOM approval only.
- For better performance, solar panels should be cleaned by customer two times in a week.
- Concealed wiring shall be done by company, if possible only. Otherwise, customer should do concealed wiring with their wiremen where material shall be provided by Company.
- After successful installation, Customer shall take care of solar plant by doing timely cleaning. If we found less generation at the time of attending complaint due to non-cleaning, we may charge you additional service charge.
- There is manufacturing warranty for all electronics equipment. Company will help to claim this warranty if require.

Government Subsidy:

- **Delay Disclaimer:** Please note that subsidy amounts may experience delays from the government's side. Our company is not liable to compensate for any delays or non-receipt of subsidies if not provided by the government.
- **Subsidy Credit:** If applicable, any subsidy will be directly credited to the customer's account. Our company will handle all necessary documentation with the government.

1. Solar Panel (PV Modules) Performance Warranty

- 90% of rated capacity for the first 10 years.
- 80% of rated capacity for the next 15 years.
- Total Panel Life: 25 years.
- Refer Solar Panel Datasheet for detailed warranty terms

2. Inverter Manufacturing Defect Warranty:

- 7 years, extendable.
- Refer Inverter Datasheet for detailed warranty terms

3. Balance of System (BOS):

- Equipment/products supplied by us which are warranted against defects due to poor material, design, or workmanship.
- This warranty is valid for 12 months from the date of commissioning or when put into service, whichever is earlier.

4. Operation & Maintenance:

- We offer 5 years of O&M support, including fault finding, remote monitoring, site visits, and assistance with warranty claims for components.
- O&M does not include solar panel cleaning and washing.

Warranty Notes:

- All warranties provided by the manufacturer/supplier are in favour of the buyer and cover the equipment for the specified period.
- Warranties ensure safe working of individual components and vary in validity period.
- Warranties do not cover damages caused by external hazardous conditions.

Schedule for Site Completion:

- Dispatch within 6 weeks after order confirmation with payment.
- The entire power plant will be installed and commissioned within 60-70 days (approx.) after project accreditation, contract agreement, and possession of the site.

Payment Terms:

- 10% advance payment upon contract signing
- 90% Before Dispatch.

Warranty Exclusions:

- The warranty will not cover failures due to:
- Damage or defect caused by misuse, lack of maintenance, improper usage, or negligence by the owner
- Wilful damage, normal wear and tear, abuse, or misuse of equipment/product.
- Damage or defect caused by Force Majeure events, including fire, earthquake, flood, or other natural disasters.
- Damage or defect caused by unauthorized alterations, modifications, or conversions.
- Repairs carried out by personnel not authorized by the contractor.
- Defects or damages due to external causes.
- Parts and components repaired or replaced during the warranty period are warranted only for the original warranty period. The contractor will take back replaced or defective material.

Scope of Work For Customer:

- Providing access/approach to rooftop.
- If any electrical modification is required from DISCOM (i.e. ELCB, changeover switch etc.) Customer shall provide necessary support.
- Provide necessary documents for project approvals from State/Central Government .
- Site clearance, ladders, water, and electricity supply for smooth installation and commissioning of the project.
- Customer shall provide Safe Place for Material unloading and storage during the work execution
